

Purchase Request Module

User Guide & Step-by-Step Examples

This document explains what the module does, how the approval flow works, and how to use it with practical ex

Part 1: Module Functionality

1.1 Purpose

The Purchase Request module is the starting point for internal purchasing. Employees describe what they need; managers approve; then the company either buys from a supplier (Purchase Order) or moves stock internally (Internal Picking). Everything is tracked on one form with a reference number (e.g. PR00015).

1.2 Main features

- Create purchase requests with automatic reference number (PR#####).

- Two p

1.3 Who uses the module

- Employee (Requester) - Creates and submits requests.

- Mana

1.4 Where to open it

- App menu: Purchase Requests

- Or: Pu

1.5 Approval flow (status bar)

Draft -> Waiting for Review -> Waiting for Approval -> In Progress -> Done

Rejected stops the process. The requester is notified by email when submitted.

1.6 Form sections

- Header - Buttons: Submit, Approve, Reject, Done, Create RFQ (special cases).

- Main

1.7 Line options (Requisition Action)

- Internal Picking - Move stock between locations (no supplier).

- Purch

1.8 Budget fields (when visible)

Visible to department managers and users with budget access. Shows whether the department has enough budget before approval. Remaining budget turns red if the request may exceed the limit.

Part 2: How to Use (By Role)

2.1 Employee - Create a request

1. Open Purchase Requests and click New.

2. Com

2.2 Manager - Review and decide

1. Open requests in Waiting for Review or Waiting for Approval.

2. Rev

2.3 Procurement - New products and purchase orders

1. For catalog items: after approval, process via Purchase Orders linked to the PR.

2. Clic

2.4 Warehouse - Internal transfers

1. Open related pickings via the Pickings button (stock managers).

2. Vali

Part 3: Step-by-Step Examples

Example 1 - Purchase IT equipment (buy from supplier)

Situation: IT staff needs 3 laptops. They are not in local stock; must be purchased.

Steps

1. Login as employee. Menu: Purchase Requests > Purchase Requests > New.

2. Categor

Example 2 - Office supplies from stock (internal transfer)

Situation: Admin needs 50 notebooks available in the main warehouse.

Steps

1. New Purchase Request. Category = General Category.

2. Product

Example 3 - Partial: part from stock, part to buy

Situation: Need 20 chairs. Only 8 in stock; buy 12 from supplier.

Steps

1. New PR. Category = General Category.

2. Add line

Example 4 - New product not in catalog

Situation: Request a new software subscription not listed as a product.

Steps

1. New PR. Enable checkbox: New Product Request.

2. Product

Example 5 - Manager checks budget before approval

Situation: Department has a yearly budget; manager must verify before approving.

Steps

1. Employee submits PR with lines and estimated costs.

2. Manage

Quick reference - Common issues

- No products in list: wrong Category (General vs IT) on the request.

- Cannot
